

## Product Overview

# Ethanol Production Monitor

Gain timely and accurate insight into the state of U.S. ethanol production

### Features:

- Daily emailed PDF and Excel datasheet with transparency into 90 individual plant operations using natural gas nominations
- Daily PDF report detailing facility shutdowns and startups of 15 of the largest ethanol plants in the U.S. using Woodmac's proprietary infrared monitoring techniques
- Complete nominations history available back to 2010
- Alerts for facility shutdowns, ramp-up, and ramp-down events
- Nearly 9 billion gallons of annual ethanol production capacity monitored

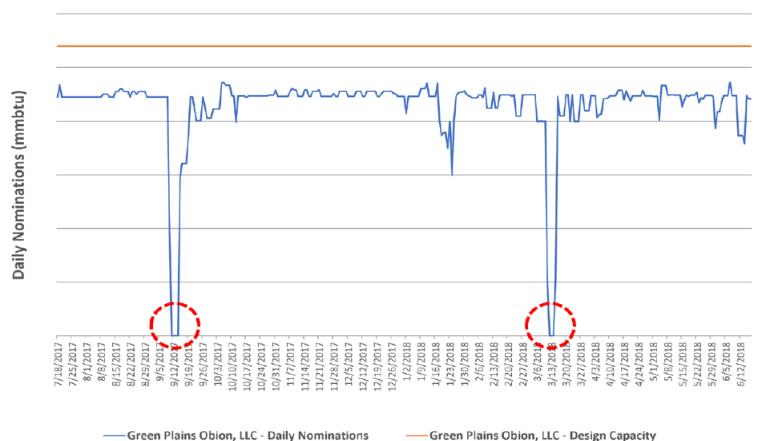

### Benefits:

- Increase visibility into unexpected shutdowns due to plant disruptions
- Gain historical perspective on ethanol nominations and impacts on production
- Feed models forecasting ethanol supply with day-ahead updates

Woodmac accesses the day-ahead natural gas schedules of 90 ethanol plants, charts the current operational status of each, and compares it to 12 months of historical data for that facility. Subscribers receive daily natural gas nominations for ethanol facilities, rolling 30-day historical raw gas nominations, and a complete nominations history back to 2010 for the points in the report.

Additionally, Woodmac incorporates proprietary methodologies to physically monitor 15 of the largest ethanol plants in the U.S. using real-time infrared imagery to detect plant shutdowns.

Woodmac reports on nearly 9 billion gallons of annual ethanol production capacity through its use of nominations and infrared imagery allowing ethanol plants, marketers, traders, buyers, transportation suppliers, and risk managers to gain visibility into the operational characteristics of individual plants.

Woodmac provides daily gas nominations and a rolling 30-day historical raw gas nomination for each ethanol facility

## Designed for you

### Traders

Our data provides valuable information on the supply-side of the ethanol market making it a precursor to ethanol storage volumes.

### Asset owners

Understand surrounding ethanol facility activities in near real-time to get a sense of available material supply and pricing.

## Related products

- [Chicago Ethanol Inventory Report](#)

Get actual ethanol inventory data for the industry's most traded hub, with granular data on over 1.2 million barrels of ethanol storage capacity.

- [New York Harbor Ethanol Inventory Report](#)

Get accurate ethanol inventory measurements at one of the most important ethanol trading points before the EIA.

### Marketers & Buyers

Be the first to know about unexpected shutdowns in near real-time to understand regional supply characteristics.

### Marketers & Buyers

Re-route truck and rail assets based on near real-time alerts of unexpected shutdowns.

- [Ethanol Exports Monitor](#)

Identify trends in the ever-changing marketplace with real-time US ethanol export data, including weekly updates on confirmed shipments and tank-by-tank storage measurements.

- [US Gulf Coast Ethanol Inventory Report](#)

Receive coverage on more than 4.6 million barrels of ethanol storage capacity
