

# Butadiene

**Understand the automotive industry** and predict future trends in production and operations

Global long-term  
forecast to **2050**

Annual updates

Supply, Demand,  
Capacity and  
Projects, Long-  
Term Pricing  
Outlook

Integrated and realistic view of  
feedstock supply and derivative  
demand

Production capacities by operator,  
location, technology and size

Market price forecasts and ratios to  
naphtha for butadiene in all major  
market centres, including key  
assumptions for energy and  
feedstocks

Demand forecasting methodology  
integrated with refining/fuels  
projections for automobile

## Use it to:

Examine the outlook  
for butadiene supply

Identify inter-regional  
trade patterns

Understand the  
supply/demand outlook  
both globally and on a  
granular regional level

Recognise pricing  
demand patterns

Assess the impact of  
demand growth, new  
investments and  
technology changes

Identify investment  
opportunities and  
manage risk in the  
commodity chemical  
markets
