

Paraxylene and PTA

Get insight on the **commercial and strategic drivers** of paraxylene and PTA supply and demand

Forecasts to **2050**

Bi-annual updates

Supply, Demand,
Trade, Capacity and
Projects, Long-Term
Pricing Outlook

Consistent, granular,
application focused
demand taxonomy:
with new, integrated
Materials Applications
Platform

Price forecast for the PX and PTA industry including an integrated view from oil to polyester

A view of feedstocks, incorporating our view of mixed xylenes, toluene, naptha, reformate, octane and blend values, as well as PX and PTA long-term price and margin forecasts

Excel models and interpretive reports with an **integrated view of producer capacity, production and trade**

Use it to:

Examine the outlook on production costs and profitability for PX and PTA

Identify inter-regional trade patterns and arbitrage opportunities

Assess the impact of plant outages, supply restrictions, technology changes and other factors

Identify investment opportunities and manage risk in the commodity chemical markets

Understand the supply/demand outlook globally and regionally, by country

Recognise and understand price drivers
